Instructions for Patients Undergoing **General Anesthesia or IV Sedation**

- Do not have anything to eat or drink for **6 hours** prior to your surgery.
- Please have someone present with you to provide safe transportation after your surgery. For your own safety, you cannot drive yourself home or take public transportation without an escort.
- Unless your doctor informs you otherwise, take your usual prescription medications on your day of surgery with small sips of water.
- Make arrangements to have someone with you after your surgery. Many of the sedative effects from general anesthesia will continue for the remainder of the day. Having someone you trust nearby to assist you will ensure that you will have a safe and comfortable recovery.
- Please contact our staff directly if you have any questions regarding your surgical care.
- You can fill-out patient information forms prior to your appointment to make your visit quicker.
- Thank you for choosing *Sierra Oral & Facial Surgery*.
